

Contract Operations Services

ARRO offers a number of contract operations services and solutions that are economical, practical and flexible. We provide owners with the confidence that their facility is being properly operated in accordance with regulatory requirements, valuable equipment is properly operated and maintained, and costly downtime is being reduced or eliminated.

We understand that our reputation rests on committing to our clients, anticipating their needs and staying ahead of their expectations.

CONTRACT OPERATIONS SERVICES

- Contract management
- Operations consulting
- Contract operations
- Operator training

CONTRACT MANAGEMENT

Trust in the professionals at ARRO to fill top management responsibilities and manage the day-to-day activities of your facility. Contract management allows for the client to retain responsibility for all operating personnel, equipment, and liabilities. Contract management services can be provided to assist a client for a brief period to allow the client time to consider how best to continue in the long term. Or, ARRO may simply provide a part-time manager to establish the procedures and policies for the treatment facility.

ARRO ADVANTAGE

- Professional facilities management with a focus on cost-control
- In-depth knowledge of current and developing regulations
- Comprehensive, in-house capabilities

OPERATIONS CONSULTING

ARRO will often contract to provide qualified and licensed staff to assist in the operation and maintenance of treatment facilities. This covers a broad spectrum of services including troubleshooting, training, part-time operation and even staffing. These services are often provided on an hourly or part-time basis, dependent on the client needs. The client still retains responsibility for all other expenses and aspects of the operations and maintenance of the facilities.

CONTRACT OPERATIONS

Contract operations of wastewater and water facilities is a responsible answer to escalating costs and regulatory compliance issues that surround the operations and maintenance of treatment facilities. Simply stated, contract operations is an alternative where the client retains ARRO for operations and maintenance responsibilities that can range from labor only to full-service operations.

UNDER A TYPICAL LONG-TERM CONTRACT, ARRO PROVIDES:

- Employees and technical support staff
- Operations and maintenance of the facilities
- Electric power
- All required chemicals, supplies, fuels, lubricants and parts
- Records of operation and maintenance
- Filings of state operations reports

The client receives guaranteed performance, guaranteed maintenance, professional management, a cost-efficient program with reduced personnel problems and enhanced protection of valuable equipment.

OPERATOR TRAINING

In upholding the philosophy that providing contract operations is more than just operating and repairing equipment, ARRO offers flexible, on-site training to operators and managers of treatment and pretreatment facilities that are specifically tailored to the needs of our clients. From laboratory procedures and troubleshooting to pollution control programs, our highly-experienced staff offers a blend of technologically-sound strategies with innovative approaches to give our clients the ability to maintain a facility that not only achieves regulatory compliance, but is cost-efficient and environmentally responsible.

OUT IN FRONT 

ABOUT ARRO

ARRO is a full service engineering and environmental consulting firm employing more than 130 professionals in offices located throughout the mid-Atlantic region. Our success, shared with the clients and communities we serve, can be summed up in one message: ***we stay out in front.***
